HOMEPAGE: WWW.NPB.DK

PERSONAL INFORMATION

DATE OF BIRTH: May 9, 1974
NATIONALITY: Danish and Swedish
CIVIL STATUS: Married, two children (born 2009 and 2011)

WORK EXPERIENCE

- 2023 – present **Research Scientist, RISE Research Institutes of Sweden, Borås, Sweden**
- Research on measurement technology
- 2019 – 2023 **Senior CAE Engineer, Volvo Car Corporation, Electric Driveline, Göteborg, Sweden**
- Electric driveline research and development:
 - Thermo-fluid modelling and simulation
- 2016 – 2019 **Expert and Senior Specialist, Computational Fluid Dynamics (CFD), Danfoss A/S, Refrigeration and Air Conditioning Controls, Nordborg, Denmark**
- Valve research and development:
 - CFD simulations
 - Acoustic measurements
- 2011 – 2016 **Senior Research Engineer, Siemens A/S, Flow Instruments, Sønderborg, Denmark**
- Flowmeter research and development:
 - Technology project management
 - Coriolis and electromagnetic flowmeters
- 2006 – 2011 **Scientist and Principal Scientist, ABB Switzerland Ltd., Corporate Research, Baden-Dättwil, Switzerland**
- Air-insulated medium-voltage load break switches
 - Gas-insulated medium- and high-voltage circuit breakers
 - Pressure and optical flow measurements in circuit breakers
- 2002 – 2005 **Postdoctoral Associate, Massachusetts Institute of Technology (MIT), Cambridge, Massachusetts, USA**
- Fusion plasma turbulence measurements using phase-contrast imaging and reflectometry
 - Control software and camera for lower hybrid current drive

EDUCATION

- 1999 – 2002 **Ph.D. in Physics** from the Niels Bohr Institute at the University of Copenhagen, Denmark. The title of my Ph.D. Thesis is: “Turbulence in Wendelstein 7-AS Plasmas Measured by Collective Light Scattering”
[Included a total of two years work at the Max-Planck-Institut für Plasmaphysik in Garching, Germany]
- 1996 – 1998 **M.Sc. in Physics** from the Niels Bohr Institute at the University of Copenhagen, Denmark. The title of my M.Sc. Thesis is: “Modelling of Neutron Emissivities at JET Using Charge Exchange Spectroscopic Data”
[Included a one-year stay at the Culham Science Centre in Culham, UK]
- 1993 – 1996 **B.Sc. in Physics** (Mathematics 2nd topic) from the Niels Bohr Institute at the University of Copenhagen, Denmark

TEACHING

- 2018 – present **External examiner** of mechanical engineering in the Danish university system
- 2000 **Teaching Assistant** during a one-semester course in Mathematics (“Matematik A”) for first year Chemistry students at the University of Copenhagen, Denmark

PATENTS

- **Gas insulated circuit breaker**, publication number EP 2 455 957 A1
- **Circuit breaker**, publication number WO 2009/140999 A1

STANDARDISATION WORK

- 2015 – 2016 Member of Danish Standards
- Participation in ISO/TC 30/SC 5/WG 5 to write ISO 20456:2017:
“Measurement of fluid flow in closed conduits – Guidance for the use of electromagnetic flowmeters for conductive liquids”

LANGUAGES

- Danish (mother tongue)
- English and German (fluently spoken and written)
- Swedish (spoken)
- French (basic knowledge)

FURTHER KNOWLEDGE

- Programming languages: Fortran, IDL, MATLAB, MDS+, Pascal, Python
- Simulation tools: GT-SUITE, ANSYS CFD/Mechanical, STAR-CCM+, SIMULIA Opera-3d
- CAD tools: Autodesk Inventor, Teamcenter Visualization
- Operating systems: Windows and Unix/Linux
- Signal processing
- Experimental skills: Acousto-optic modulators, data acquisition (CAMAC, compact PCI, PCI), flowmeters, high speed cameras, infrared and visible lasers and detectors, microphones, microwave components, optics, pressure sensors

GUEST EDITOR

- MDPI Fluids Special Issue on “Flow-Based Optimization of Products or Devices”:
https://www.mdpi.com/journal/fluids/special_issues/flow_optimization

REFERENCES

Available upon request

APPENDICES

- Appendix A **Further education:** Software training, university courses, personal development, summer schools
- Appendix B **Supervision:** 17 students from B.Sc. to Ph.D. level
- Appendix C **First author** of 25 journal publications
- Appendix D **Co-author** of 24 journal publications
- Appendix E **Refereeing** for 21 journals

APPENDIX A - FURTHER EDUCATION

2021 – 2022	Teaching and Learning Physics from a Methodological Perspective , Uppsala University, Sweden
2021	Machine Learning Foundations: AI for Everyone/Introduction to Machine Learning/Neural Networks and Deep Learning Gothenburg, Sweden
2021	MathWorks training: Simulink and Stateflow , Gothenburg, Sweden
2021	STAR-CCM+ training: Efficient workflows/Meshing best practices/Effective heat transfer Gothenburg, Sweden
2020	Electrified Powertrains , Gothenburg, Sweden
2020	Teamcenter for CAD Viewer and TCVis Basic , Gothenburg, Sweden
2019	Introduction to pre-processing with ANSA , Gothenburg, Sweden
2019	Introduction to Python for CAE Engineers , Gothenburg, Sweden
2019	STAR-CCM+ training: E-motor cooling , Gothenburg, Sweden
2017	ANSYS AIM , Nordborg/Kolding, Denmark
2017	ANSYS Acoustics , Nordborg, Denmark
2016	ANSYS Mechanical , Sønderborg, Denmark
2014	Personal Performance , Nordborg, Denmark
2013	Multiphase Flow Modeling in ANSYS CFX , Aarhus, Denmark
2012 – 2013	Siemens People and Business Management 3 (PBM3) , Billund, Denmark
2011	Opera-3d software training course , Kidlington, England
2011	Introduction to ANSYS CFD with CFX , Oslo, Norway
2009	KARRASS Effective Negotiating , Zürich, Switzerland
2007	Introduction to Macroeconomics , ETH Zürich, Switzerland
2007	ABB Leadership Challenge Program , Zürich, Switzerland
2006	ABB Project Management Basics , Ladenburg, Germany
2001	16th NATO Advanced Study Institute School in Physics , Geilo, Norway
1999	4th Carolus Magnus Summer School on Plasma Physics , Maastricht, The Netherlands
1997	34th Culham Plasma Physics Summer School , Culham, England

APPENDIX B - SUPERVISION

2023	Sunil Rangaswamy and Axel Larsson, M.Sc. students at Chalmers University of Technology “Thermal Modelling of Heat Transfer Between Ambient Air and Powerpack”
2018	Adrien Chéreau, M.Sc. student at INSA Rennes “CFD-based optimisation using open-source tools”
2014 – 2016	Matej Simurda, Ph.D. student at the University of Southern Denmark “Mathematical Modeling of Ultrasound Propagation in Multi-phase Flow”
2016	Michael Leth-Nielsen, M.Sc. student at the University of Southern Denmark “Simulations of AC magnetic fields in flowmeters”
2015	Janna Hofmann, M.Sc. student at Karlsruhe Institute of Technology “Upgrade of a LabVIEW control system of a 3D measuring robot to analyze the magnetic field inside an electromagnetic flowmeter”
2015	Francesco Russo, intern at TU Delft CFD simulations of incompressible and compressible flow
2015	Dionysios-Konstantinos Neofytos, M.Sc. student at the University of Southern Denmark “High speed gas flow measurements and analysis in Coriolis flow meters”
2014	Darlene O’Carroll, intern at University of Limerick Competitor benchmarking
2014	Brice Rogié, M.Sc. student at INSA Toulouse “Water Hammer Effect on Coriolis Flowmeter – Pressure Wave Propagation”
2014	Yu Lin, M.Sc. student at the University of Southern Denmark “Numerical Modeling of Electromagnetic Flowmeter”
2014	Katrine A. Juhl, M.Sc. student at Aalborg University “Aerated Flow Measurement and Modelling of a Coriolis Flowmeter”
2013	Leah Hormann, M.Sc. student at the Mannheim University of Applied Sciences “Computational Fluid Dynamics Simulations of Electromagnetic Flowmeters”
2013	Matej Simurda, M.Sc. student at the University of Southern Denmark “Two Dimensional Analysis of Clamp-On Ultrasonic Flowmeters”
2012	Elvar Ásmundsson and Mikkel H. Callesen, B.Sc. students at the University of Southern Denmark EA: “Turbulent Flow in Straight Pipes” MHC: “Pressure Loss in Pipes”
2010	Christopher Kissing, M.Sc. student at the Cologne University of Applied Sciences “Untersuchung von dreidimensionalen Strömungen in einem kleinen Schaltermodell”
2004 – 2005	Arturo Dominguez, Ph.D. student in the MIT Department of Physics “Study of Density Fluctuations and Particle Transport at the Edge of I-Mode Plasmas”

APPENDIX C - FIRST AUTHOR

1. **An algebraic non-equilibrium turbulence model of the high Reynolds number transition region**, N.T.Basse, *Water* 15 (2023) 3234
2. **Extrapolation of turbulence intensity scaling to $Re_\tau \gg 10^5$** , N.T.Basse, *Physics of Fluids* 34 (2022) 075128
3. **Scaling of global properties of fluctuating streamwise velocities in pipe flow: Impact of the viscous term**, N.T.Basse, *Physics of Fluids* 33 (2021) 125109
4. **Scaling of global properties of fluctuating and mean streamwise velocities in pipe flow: Characterization of a high Reynolds number transition region**, N.T.Basse, *Physics of Fluids* 33 (2021) 065127
5. **Application of the amended Coriolis flowmeter “bubble theory” to sound propagation and attenuation in aerosols and hydrosols**, N.T.Basse, *Flow Measurement and Instrumentation* 77 (2021) 101875
6. **Modelling of vortex-induced aviation turbulence**, N.T.Basse, *Meteorology and Atmospheric Physics* 132 (2020) 401-411
7. **Editorial: Flow-based optimization of products or devices**, N.T.Basse, *Fluids* 5 (2020) 56
8. **On the analogy between the bias flow aperture theory and the Coriolis flowmeter “bubble theory”**, N.T.Basse, *Flow Measurement and Instrumentation* 71 (2020) 101663
9. **Turbulence intensity scaling: A fugue**, N.T.Basse, *Fluids* 4 (2019) 180
10. **Turbulence intensity and the friction factor for smooth- and rough-wall pipe flow**, N.T.Basse, *Fluids* 2 (2017) 30
11. **Coriolis flowmeter damping for two-phase flow due to decoupling**, N.T.Basse, *Flow Measurement and Instrumentation* 52 (2016) 40-52
12. **A review of the theory of Coriolis flowmeter measurement errors due to entrained particles**, N.T.Basse, *Flow Measurement and Instrumentation* 37 (2014) 107-118
13. **Measured 3D turbulent mixing in a small-scale circuit breaker model**, N.T.Basse et al., *Journal of Physics D: Applied Physics* 44 (2011) 245201
14. **Measured turbulent mixing in a small-scale circuit breaker model**, N.P.T.Basse et al., *Applied Optics* 48 (2009) 6381-6391
15. **Quantitative analysis of gas circuit breaker physics through direct comparison of 3D simulations to experiment**, N.P.Basse et al., *IEEE Transactions on Plasma Science* 36 (2008) 2566-2571
16. **A study of multiscale density fluctuation measurements**, N.P.Basse, *IEEE Transactions on Plasma Science* 36 (2008) 458-461
17. **Diagnostic systems on Alcator C-Mod**, N.P.Basse et al., *Fusion Science and Technology* 51 (2007) 476-507
18. **Density fluctuations on mm and Mpc scales**, N.P.Basse, *Physics Letters A* 340 (2005) 456-460
19. **Characterization of core and edge turbulence in L- and enhanced D-alpha H-mode Alcator C-Mod plasmas**, N.P.Basse et al., *Physics of Plasmas* 12 (2005) 052512 (14 pages)
20. **Small-angle scattering theory revisited: Photocurrent and spatial localization**, N.P.Basse et al., *Physica Scripta* 71 (2005) 280-292
21. **Study of intermittent small-scale turbulence in Wendelstein 7-AS plasmas during controlled confinement transitions**, N.P.Basse et al., *Physics of Plasmas* 12 (2005) 012507 (11 pages)
22. **Characterization of turbulence in L- and ELM-free H-mode Wendelstein 7-AS plasmas**, N.P.Basse et al., *Plasma Physics and Controlled Fusion* 45 (2003) 439-453
23. **Turbulence at the transition to the high density H-mode in Wendelstein 7-AS plasmas**, N.P.Basse et al., *Nuclear Fusion* 43 (2003) 40-48
24. **Spatial distribution of turbulence in the Wendelstein 7-AS stellarator**, N.P.Basse et al., *Plasma Sources Science and Technology* 11 (2002) A138-A142
25. **Low- and high-mode separation of short wavelength turbulence in dithering Wendelstein 7-AS plasmas**, N.P.Basse et al., *Physics of Plasmas* 9 (2002) 3035-3049

APPENDIX D - CO-AUTHOR

1. **Fourier collocation approach with mesh refinement method for simulating transit-time ultrasonic flow meters under multiphase flow conditions**, M.Simurda, L.Duggen, N.T.Basse and B.Lassen, *IEEE Transactions on Ultrasonics, Ferroelectrics, and Frequency Control* **65** (2018) 244-257
2. **A Fourier collocation approach for transit-time ultrasonic flowmeter under multi-phase flow**, M.Simurda, B.Lassen, L.Duggen and N.T.Basse, *Journal of Computational Acoustics* **25** (2017) 1750005
3. **Scaling of turbulence intensity for low-speed flow in smooth pipes**, F.Russo and N.T.Basse, *Flow Measurement and Instrumentation* **52** (2016) 101-114
4. **Focused shadowgraphy in the heating volume of a high-voltage gas circuit breaker**, R.Wiget, F.Lundqvist and N.T.Basse, *IEEE Transactions on Plasma Science* **39** (2011) 2852-2853
5. **Arc-induced turbulent mixing in an SF₆ circuit breaker model**, R.Bini, N.T.Basse and M.Seeger, *Journal of Physics D: Applied Physics* **44** (2011) 025203
6. **Overview of the Alcator C-Mod research programme**, S.Scott, A.Bader, M.Bakhtiari, N.Basse et al., *Nuclear Fusion* **47** (2007) S598-S607
7. **Energetic particle physics studies on Alcator C-Mod**, J.A.Snipes, N.Basse et al., *Fusion Science and Technology* **51** (2007) 437-450
8. **Internal transport barriers in Alcator C-Mod**, C.L.Fiore, D.R. Ernst, J. E. Rice, K. Zhurovich, N. Basse et al., *Fusion Science and Technology* **51** (2007) 303-316
9. **Confinement and transport research in Alcator C-Mod**, M.Greenwald, N.Basse et al., *Fusion Science and Technology* **51** (2007) 266-287
10. **Phase contrast imaging of waves and instabilities in high temperature magnetized fusion plasmas**, M.Porkolab, J.C.Rost, N.Basse et al., *IEEE Transactions on Plasma Science* **34** (2006) 229-234
11. **Comparisons of small ELM H-mode regimes on the Alcator C-Mod and JFT-2M tokamaks**, A.E.Hubbard, K.Kamiya, N.Oyama, N.Basse et al., *Plasma Physics and Controlled Fusion* **48** (2006) A121-A129
12. **Transport phenomena in the edge of Alcator C-Mod plasmas**, J.L.Terry, N.P.Basse et al., *Nuclear Fusion* **45** (2005) 1321-1327
13. **Overview of the Alcator C-Mod program**, M.Greenwald, D.Andelin, N.Basse et al., *Nuclear Fusion* **45** (2005) S109-S117
14. **Observation and modelling of ion cyclotron range of frequencies waves in the mode conversion region of Alcator C-Mod**, Y.Lin, S.Wukitch, A.Parisot, J.C.Wright, N.Basse et al., *Plasma Physics and Controlled Fusion* **47** (2005) 1207-1228
15. **W7-AS: One step of the Wendelstein stellarator line**, F.Wagner, S.Bäumel, J.Baldzuhn, N.Basse et al., *Physics of Plasmas* **12** (2005) 072509 (22 pages)
16. **Ion cyclotron range of frequency mode conversion physics in Alcator C-Mod: Experimental measurements and modeling**, S.J.Wukitch, Y.Lin, A.Parisot, J.C.Wright, P.T.Bonoli, M.Porkolab, N.Basse et al., *Physics of Plasmas* **12** (2005) 056104 (8 pages)
17. **Active and fast particle driven Alfvén eigenmodes in Alcator C-Mod**, J.A.Snipes, N.Basse et al., *Physics of Plasmas* **12** (2005) 056102 (8 pages)
18. **Toroidal rotation and momentum transport in Alcator C-Mod plasmas with no momentum input**, J.E.Rice, W.D.Lee, E.S.Marmor, N.P.Basse et al., *Physics of Plasmas* **11** (2004) 2427-2432
19. **Investigation of ion cyclotron range of frequencies mode conversion at the ion-ion hybrid layer in Alcator C-Mod**, Y.Lin, S.Wukitch, P.Bonoli, E.Nelson-Melby, M.Porkolab, J.C.Wright, N.Basse et al., *Physics of Plasmas* **11** (2004) 2466-2472
20. **Local threshold conditions and fast transition dynamics of the L-H transition in Alcator C-Mod**, A.E.Hubbard, B.A.Carreras, N.P.Basse et al., *Plasma Physics and Controlled Fusion* **46** (2004) A95-A104
21. **Changes in density fluctuations associated with confinement transitions close to a rational edge rotational transform in the W7-AS stellarator**, S.Zoletnik, N.P.Basse et al., *Plasma Physics and Controlled Fusion* **44** (2002) 1581-1607
22. **CO₂ laser based two-volume collective scattering instrument for spatially localized turbulence measurements**, M.Saffman, S.Zoletnik, N.P.Basse et al., *Review of Scientific Instruments* **72** (2001) 2579-2592
23. **Trace tritium and the H-mode density limit**, G.F.Matthews, K.-D.Zastrow, P.Andrew, N.P.Basse et al., *Journal of Nuclear Materials* **266-269** (1999) 1134-1138
24. **Neutron profile measurements for trace tritium experiments**, M.J.Loughlin, N.Watkins, J.M.Adams, N.Basse et al., *Review of Scientific Instruments* **70** (1999) 1123-1125

APPENDIX E - REFEREEING

2022 – present	Cryogenics
2021 – present	Physics of Fluids
2021 – present	Sensors
2021 – present	Geosciences
2020 – present	Atmosphere
2020 – present	Processes
2020 – present	Aviation
2019 – present	Measurement
2018 – present	Smart Materials and Structures
2018 – present	Water
2018 – present	Fluids
2018 – present	Multidiscipline Modeling in Materials and Structures
2015 – present	Measurement Science and Technology
2014 – present	Flow Measurement and Instrumentation
2012 – present	Journal of Physics D: Applied Physics
2010 – present	Physics Letters A
2010 – present	IEEE Transactions on Power Delivery
2009 – present	Physics of Plasmas
2009 – present	Plasma Physics and Controlled Fusion
2008 – 2015	The Open Plasma Physics Journal
2007 – present	IEEE Transactions on Plasma Science
2005 – present	Nuclear Fusion
2004	US Department of Energy
